

Sharks

Kensho Ueda

Sharks have many good senses.

Sharks have good senses like smelling, hearing and vision. Sharks can be dangerous when they are using those senses. For example, when a person is swimming the shark could start chasing the person instead of chasing the fish. What are people doing in the ocean that causes the shark to start chasing the person instead of chasing the fish? What do sharks like about people that make the sharks start chasing the person? In this article you will find out.

Great Sense of Smell

Sharks have a good sense of smell especially to spot their own food. They are also good at sniffing the water. Sharks can be dangerous in many ways, like when sharks smell types of food that they eat, they can start to chase their own food. You need to be careful of where you swim because sharks may notice you with their great sense of smell. Sometimes people can make a trap for the sharks to go in. One

A shark trying to find food.

trap is that sometimes people can place a shark's favorite food in the water with a big net around it and sharks can smell the food inside the trap. The people can raise the net up!

Hearing

Sharks have great hearing. Sharks also can spot their own food because if a sharks hears fish swimming the shark can start chasing the fish. Another reason why sharks

Sharks can be dangerous when they're using their senses.

sense of hearing is good is that when sharks hear people trying to make a trap, the shark can go swimming in the opposite direction of the trap to save itself.

Sense of Vision

Sharks also have a good sense of vision because when sharks are hunting for their food they can look around the ocean while the shark is swimming. They are also good for seeing traps in the ocean that people make to capture many kinds of sharks. Then they can get away from the trap and be safe.

Sharks have many good senses like smelling, hearing and vision. Sharks can be dangerous when they're using their senses, so you need to be careful when you see a shark. That's using your senses!
