

Take care of your community

By: Maxliam Logar

05/30/2015

It's time to meet your worst habit...Littering! Do you know only 5% of water bottles are recycled each year? In this photo-essay you will find out scary facts about your community.

05/29/2015

Littering

First of all littering is bad for the community. “People don’t take care their community,” says George Logar a parent on the Upper East Side. He said new Yorkers throw out too much trash. Each year 705 lbs of paper are thrown out says www.MotherJones.com and I think this is bad because trees are going to waste. Also you can get a fine for littering says a police officer (NYPD).

05/29/2015

Graffiti

Second of all graffiti is bad. First graffiti is vandalism. Second graffiti is illegal and in an interview with Mr. Logar he said graffiti was not art it was vandalism and I agree this is bad for the community because you are damaging someone else's property.

Trees

Third of all cutting down trees is bad. www.WWF.org says since trees are being cut down it's endangering animals like birds. I also think there's now less forest and more buildings and we don't get to enjoy nature.
