

# Dog Health

By Maximilian Williams

I think that dogs in NY need a lot of exercise every day and healthy, safe choices to be happy healthy dogs.

First of all, dogs need exercise to stay healthy in NY and everywhere.

Cbslocal.com says that you should walk your dog about two times a day, once in the morning and once at night depending on how big your dog is. Also, I did an interview with my cousin. She has two dogs and says about the same thing. She says that dogs need a lot of exercise everywhere. They should go out in the morning and at night and sometimes on the weekend you should do an extra walk.

Next [nycgovparks.org](http://nycgovparks.org) shows a lot of good dog walking parks and the two best ones are Carl Schurz Park and Central Park. Central Park has one dog park for off leash dogs and Carl Schurz Park has two dog parks that are both dog run parks.

Also I walked my cousin's dogs and we were all so tired after and they said it was one of the longest walks they had ever done. We walked almost the whole day and that made me think that you can do two normal walks or one big one in a day.

# BISCUITS & BATH

**Secondly, dogs need care from their owners to stay happy and healthy. Cbslocal.com says that Biscuits and Bath is a good 24-hour dog day care and place for grooming. There are also pet vet care services and dog walkers if you don't have time to walk your dog.**

**Once I was at my cousin's house and they had to go to work and school. Me and my mom had to take care of the dogs so my cousins didn't have their dogs go to day care.**

Lastly, you need to be aware of what your dog is doing to keep it safe and healthy. Cbslocal.com says that you should never let your dog lick a puddle because it can have deadly toxins like anti freeze. They also say look in a dog park before you enter because there can be sick or very aggressive dogs witch are especially dangerous in enclosed areas.

In conclusion, I think that you should be wary of the choices you make for your dog. You should be aware of how your dog is feeling and its health and you should treat your dog like a human, like keeping up with vaccines.
