

Jobs

*By: Benjamin
Milligan*

Payment

- You have to work hard for money

Your boss pays you

How much did I get paid

- \$7.75 a hour again but I worked over time

Treatment

- Just doing my job when...

Bad tenants

- The grumpy old troll

Safety

- Not the safest tools

Boiler Room

BOILER ROOM

NOTICE

KEY TO HEATING SYSTEM AREA LOCK
IS LOCATED AT:

NAME: _____

LOCATION (APT.#): _____

DEPARTMENT OF HOUSING PRESERVATION
AND DEVELOPMENT

**N.Y.C. BOILER
FEDERAL DEVICE
#MD21412-1**

**AUTHORIZED
PERSONNEL
ONLY**

I hope I don't screw myself

You need an education to work

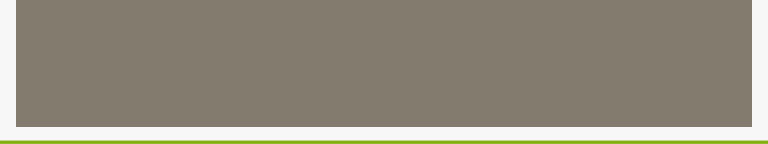

I hope I don't fall

I got to take these photo
because of my dad and
grandpa's job

- 
- Have you ever thought to yourself, “Hey its time to find a job.” Well then keep reading here are some of the elements to follow.
 - First lets start off with payment. Of course it’s your favorite but it’s the most important part. As you know most jobs only pay \$7.75 an hour especially fast food places. You want to find a job that pays a good amount and a job that you like, but I also think that if you have kids you should get paid more but NO ONE CARES! So when you look for a job, keep this in mind.
 - Now another thing you should look for, Treatment. You don’t want to get treated like a slob when you’re working. Doormen and waiters are usually dealing with the worst. No please or thank your, its like your there servant. You don’t want to have a job when you get treated like a no one.
 - Last but not least, safety. Don’t get a job that can get you hurt easily. If you have a job like my grandpa who has to work in the boiler room. (Luckily he knows what he’s doing.) But if he did not know what he was doing someone could get hurt or even die, and if a kid gets down there he’s fired.
 - Kids should not have jobs because it takes away from schoolwork and then they will get a bad grade. They may also drop out. So when you applying for a job big or small make the right chose and remember, love the little ones.
 -
