I think that basketball is sport that everyone can play if they want to. It is not is hard as hard as you think to come home from school and play basketball. It is as easy as picking up a basketball.

My first idea is that you can go to a public park and play basketball I think this because you can go to a public park. All you need is a basketball you don't always need a basketball you can join a game at the park. I also think this because if you don't play in a league or organized game you can jump into a game at the park, or you can tell some of your friends to meet you at the park and play a big basketball game. My last example is that there are a lot of parks and there is most likely one or more of them close to your house or school.

My second idea is that you can play in a league or organized game if you want to. It is fun because I play in 2 leagues myself, and I play in them with a lot of my friends. I also think this because there are a lot of places to play basketball indoors and outdoors. My last reason is some leagues don't have tryouts so that means that you automatically get on a team in the league.

My last reason is that there are a lot of places to play basketball, you can play in a Gym, School, Church, Park,(ect.)this is good because if it is raining there are indoor courts that you can play on. My last example is that you get better every time you play basketball.

That is why I think that everyone can play basketball if they want to.
