calming your horse after a nice ride

Jumping 2 feet

Petting one of the ponies

Working out you horse...

Resting in their stall...

working as a police horse...

Jumping in the grand prix in the Hampton classic...

HORSES ARE UNIQUE ANIMALS ESSAY

Horses are amazing, lovely, important animals. For example, horses come in all different sizes, such as ponies from 0h (1 hand) to 14.2hands. They also come in all different shapes. They mostly way from 800-1600lbs.

“Horses also made history. Because when Lewis and Clark where in need for horses they got their horses and moved along with their journey” says WWW.lewisandclarktrip.org that meant that the horses had a big task that they had did and finish. “Paul Revere used his horse horse to warn his town about the British were coming.” says www.horsespr.com that means that Paul Revere got his horse to help out by galloping 40mph for 16 miles.

A decorative floral pattern in a dark grey color, featuring stylized leaves and scrolls, runs horizontally across the top of the slide.

As you can see horses play an important roll in life, from a 30 min lesson to grand prix jumping.
