

# PLANTS

By Arianna Brenner

Someday you may have those leaves on your **pizza!**

You better thank that tree! It gives us air!

**Look at that flower bed!! I just  
may sleep on it!!**

Look at that close up! Pretty cool until you see what's next to it.... **BZZZZZZ!!!**

**Those flowers smell so good! I hope you don't have allergies!!**

The smell of fresh air makes me smile. How about you?

**Some flowers are just for  
your entertainment!**

## ESSAY

**As you can see, plants are a beautiful and helpful piece to the environment. They help the earth in several ways! For example, trees produce air to the environment. If we did not have trees for all these years none of us would be here right now!**

**Plants have many purposes, some plants are used to eat food like pizza, lasagna, Mac & cheese ect. Plants that go on food are basil and mint plants. Plants help animals live. Animals eat several plants! Plants produce food for everyone, they grow fruits and vegetables for humans and animals! Plants can be grown or grow naturally almost any wear including the bottom of the ocean, the dessert, the city, and plants can be grown In your very own apartment or house!**

**plants are a great piece to the environment**
