

Basketball

BY: Alexander Haber

This is now one of the most favored shots... The three point shot

The ball is rising in the air getting ready to...

Splash, right through the hoop

This is a move where you dribble the ball through your legs

Like so....

This a really affective move called a crossover

You fake one way and quickly go the other while crossing the ball from one side to the other

This another affective move called a behind the back. You have to dribble the ball behind your back so your defender wont know where your going
