

# Different Types Of Restaurants on the Upper East Side

By: Brooke Jaffe

There is a large *diversity* of restaurants on the Upper East Side.

It can be as simple as a bagel store...

or as *fancy* as a Turkish restaurant.

Choices range from Mexican food

to a *fun* burger place to hang out in...

there are always many options.

If you crave **flavorful** Japanese food...

or *spicy* Indian food...

or sweet crepes for dessert...

or a frozen yogurt,  
you always have an option.

And of course, no neighborhood  
would be complete without a  
**Starbucks!**

The Upper East Side is a neighborhood in Manhattan stretching from Central Park/ Fifth Avenue to The East River (West to East) and 59<sup>th</sup> Street to 96<sup>th</sup> Street (South to North). Within this large area there is a huge *diversity* (many different types) of restaurants and food places.

In 1837 The [New York and Harlem Railroad](#) brought straggling developments to The Upper East Side. Over time the area attracted many people of German ancestry. By the 1950's the area saw the German culture thrive. The Germans opened up many butchers and bakery shops during this period.

During the 21<sup>st</sup> century the Upper East Side has become a home to many families with children because of its great schools and friendly neighborhoods. The area has continued to diversify with Asian, Hispanic and many other ethnic groups moving in. These new inhabitants brought changes to the culture as well, with shops and restaurants springing up throughout the area.

Next time your looking to have a meal on The Upper East Side, remember there are a variety of restaurants to pick from. Try them all as they all have great things to offer!
