

HOW TO MAKE FRUIT FLOWERS

By Pereira Anastasia

Just an avocado now, but soon it wont be.

Now have to cut it and take out the pit.

Time to place the slices and then ...

Tada! don't you think that this looks delicious.

Now add the lemon,

And my favorite part eat it!

Yum!

My essay

- Some artists use clay, stone or marble to sculpt, but I use fruit! I think fruit is good to sculpt with because it is a natural resource with its natural beauty and color. Also its fun to see something that you might eat a lot and now it looks cooler!
- I chose this topic because I love fruit and flowers, and I could not choose between them. My aunts were the ones who inspired me to do fruit and flowers together from a youtube video on how to make the fruit flowers.
- I am glad that I chose this topic because it is absolutely unique and I think that its pretty cool. Also it's a very fun topic because you get to eat your project at the end. 😊
