**The Facts: two Lego 2 x 4 bricks can be built into 24 different ways. Three Lego 2 x 4 bricks can be combined into 1,060 different ways. Six 2 x 4 bricks can be built into 915,103,765. That's amazing, right? It makes Lego the most versatile toy in the world. Approximately 19 billion Lego elements are produced per year. 2.16 million are molded every hour, 36,000 every minute.**

**"Only the best is good enough" is what the sign says in Danish in Ole Kirk Christianson's workshop, to inspire his workers to do their best, because he thought kids deserved the best.**  
**"Det Bedste Er Ikke For Godt"**

**Lego brands: There are many different brands of Lego. They include: Lego batman, Lego pirates, Lego superheroes ... and many more.**

**The Lego Star Wars theme has a record of having over 300 sets alone! That is enough to write a full book about. The reason Star Wars sets were so popular was because the movie was a very big hit, even though it came out over 30 years go!**

**The Lego super heroes theme includes both Marvel and DC comics. This is a very big deal because they are the leaders for all super hero comics. I can't figure out who makes more money from Lego on a deal like this, so I investigated:.....**

**Facts show that Germany is**

**the number-one Lego market, in fact, Lego is the number-one toy company in Germany. The top-selling lines in Germany are Lego TECHNIC and Lego CITY. The U.S. is the second largest market, with the top-selling lines being BIONICLE and Lego Star Wars. The company Lego made over \$300,000,000 last year.**

**How they are made**

**Lego is made from a plastic formula called A.B.S. This plastic formula is kept secret because they don't want company's to use it on their toys**

**The Lego design**

**In designing the Lego mini figure's head Lego did not want it to be like a cylinder they wanted it to be more of a rounded shape.**
