

# DINOSAURS

BY EMILY GALEA

EVERYBODY LOVES DINOSAURS. SO BEFORE YOU GET EXTINCT. YOU SHOULD READ THIS STORY. SO KICK BACK AND START READING BEFORE YOU BECOME A FOSSIL

## DINO'S LIFE SPAN

WHEN DINOSAURS GOT EXTINCT 65 MILLION YEARS AGO 30% OF ANIMALS LIVED BUT 70% OF ANIMALS DIED. THAT MEANS 700 SPECIES OF ANIMALS DIED ON THAT DAY. DINOSAURS LIVED 245 MILLION YEARS AGO. THEY LIVED ON JANUARY 1 TO THE THIRD WEEK OF SEPTEMBER THEY WERE ALL GONE ON THAT DAY.

then

now

## EXTINCTION BRAIN

SCIENTIST NEVER KNEW WHAT WAS THE CAUSE OF THE EXTINCTION. SO FOR ALL THESE YEARS THEY WERE JUST GUESSING WHAT IT WAS... HERE ARE SOME THINGS THEY GUESSED: ICE AGE, ASTEROIDS IMPACT, VOLCANO, AND DISEASES. SCIENTISTS CAME UP WITH EVERY THING. THEN THEY FOUND IT WAS 2 OF THE SCIENTIST WERE RIGHT IT WAS A VOLCANO AND AN ASTEROID IMPACT.

## FIRE SITUATION

TWO MASSIVE DISASTERS TOOK PLACE THAT DAY. THE VOLCANO ERUPTED AND A METEORITE HIT EARTH. THAT'S WHAT CAUSED THE EXTINCTION OF THE DINOSAURS. THE FIRST ACTION THAT TOOK PLACE WAS THE ASTEROID THEN THE VOLCANO. THE TWO MASSIVE DISTORTIONS WERE SO STRONG THAT THEY SHOOK THE FLOOR WHEN THEY RAN BUT THEY DID NOT RUN FAST ENOUGH. THE ONLY DINOSAURS THAT GOT AWAY WERE THE ONES THAT CAN FLY
