

NAIL POLISH DESIGNS

by: Chloe Sargenti

INTRO

Nail polish can be seen in many ways but when I see it, it looks like art. I see it as art because you can make it however you like, and it's a way to express yourself.

NAIL STICKERS

Nail stickers are an amazing way to design your nails! Easy to use and easy to take off, however my favorite thing about nail stickers is that there are so many of them.

GLITTER NAILS

Glitter nails are an amazing way to stand out in a crowd. In my opinion, glitter nails are a statement saying I'm so awesome.

CRACKLE NAILS

Crackle nails are unique and cool. It shows that you are in with the trends and it means you are in with all the styles. That's super cool!!!

PATTERN NAILS

Pattern nails are very common. Pattern nails are simple and fun, it shows that you have a great personality.

FAKE NAILS

Fake nails are used for a lot of different reasons one main reason people use fake nails is that their nails are too short. Another big reason is people want a special design you can only get on a fake nail.

GLOW NAILS

Glow nails are plain and boring in the day time but when the sun is down they're awesome.

FRENCH NAILS

French nails are great because you can be so colorful with them. If your only using fingers you have 20 colors to choose from.

HISTORY ESSAY

Have you ever wondered how nail polish first became a product, did an artist make it to express how they felt at the time? I guess you don't have to be an artist to express yourself through nail polish. I wonder when nail polish started and how did it change over the years?

Most sources point to China as the originator of nail polish. It was made around 3000 BC and made out of egg whites, gelatin and bees wax, and different colors came from vegetable sources. Years later people turned to oils, powders, and paste to tint their nails.

In the early 1900's companies like Cutex and Revlon modified the formula of paint used on automobiles to create a varnish suitable for nails. In 1981, when Essie Weingarten debuted a collection of 12 unusual nail polish shades and changed the industry forever because no one has ever seen these colors before.

One of the latest and trendiest nail polish styles is all your nails one color but your ring finger is another. Another new style is full nail stickers, they cover up your whole nail with an awesome design.

Nail polish has evolved to a point where there are many amazing and fabulous new styles, one for everyone, so there has to be the right nail polish for you.
