

# THE RIGHT AND WRONG THINGS THAT HAPPEN

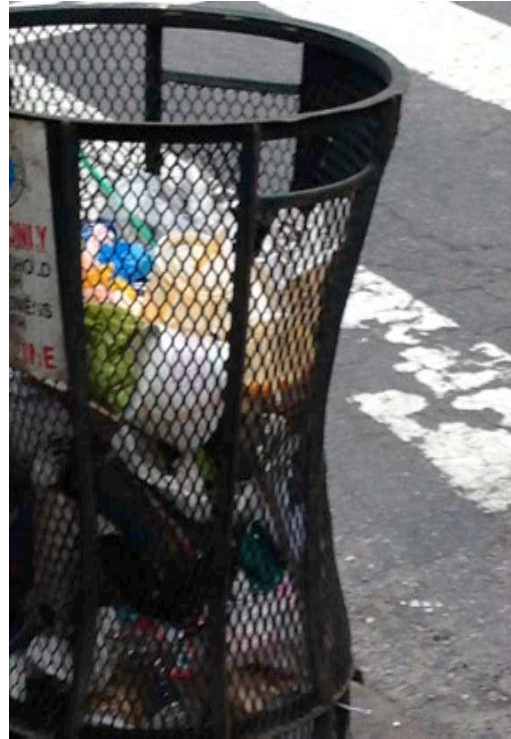

Your Actions Matter!  
Photographer and Writer:  
Sophie Krejci

- Some people think, “I know the right and wrong things to do!” Yet, the question still is, do you really? Everyday, on the news, people report that someone has been kidnapped, or someone did something illegal. Those people are adults, they know they did something wrong. Though, they still do it. Is it because they don’t care? They know this is a big problem. Especially when it’s all over the news or in articles. That’s not what this is about. What I am talking about is as simple as leaving dog poop on the floor. Or even, leaning back in your chair so in a split of a second you will fall back, and maybe break the chair. These things can interfere in people’s lives. It may not be the top story in America, but you still see it everyday, you just don’t realize it. This is to prevent you from continuing those pet peeves.
- 
- People being lazy, can interrupt with your day. You may step on a crack’t beer bottle and it can get stuck in your shoe. What if it is raining outside and you slip and fall on it. Or if your on your way to work, and there is dog poop on the ground? You step in it and its smushed against your shoe like it is a magnet. I pronounce you, late for work. This interrupts with your day.
-

# Garbage Cans To The Top?

VS.

### Opinion Box:

This is Sharpys for kids. Even though its for little kids, its still a store you walk by when you are on the sidewalk. Both of these stores are on the same block. That one store can change the whole look of the block.

Makes An Ugly Place

Right

# I Don't Want to Go In!

Opinion Box:

This shows to strangers that they won't buy a bigger place. A bigger place would lead to a better result because everything would be less crowded and you can see each painting easier.

Crowded Space

# The Better Environment

Opinion Box:

I think it is healthier for there to be nothing in the tree. If there is something thick, like a stuffed animal. The stuffed animal will stay were it is and prevent the tree from growing.

Right

# Wild Creature In Tree!

## Opinion Box:

It is not safe for there to be stuffed animals on the tree. The tree can get stuck in the position it is in and won't be able to grow. No matter how it got there, it is not what you should see when you pass a tree.

Wrong

# Watch Your Step

Nothing on the ground. It is safe to walk. All you have to focus on, is to talk. It does not mean, you cannot not be careful. You always, always have to be warefull.

Right

# Watch Your Step

Cracked glass.  
Everyone goes around,  
The cracked glass.

its random  
Not pieces  
Safe. Everywhere.

Be aware!  
It could be any where!

**Wrong**

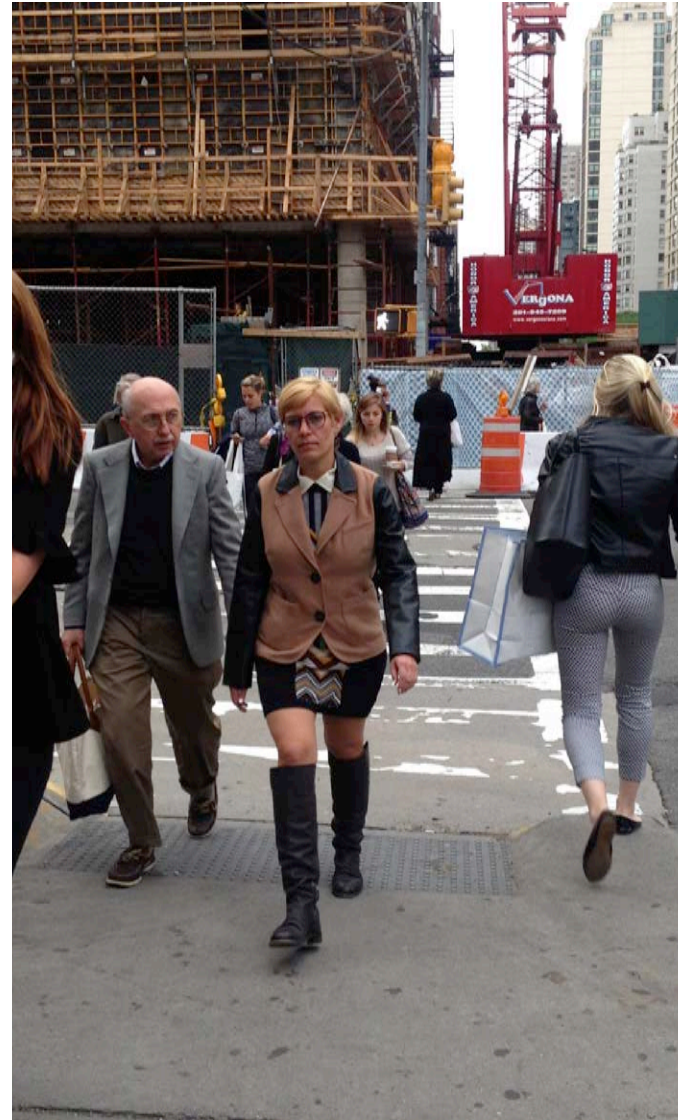

# Care For Yourself!

## Opinion Box:

Even If there are no cars crossing when they have the green light, you shouldn't go. You don't know if a car will come out of nowhere. By doing this, it shows that your concerned about yourself getting hurt or even dying.

You see a white walk man, so you go.

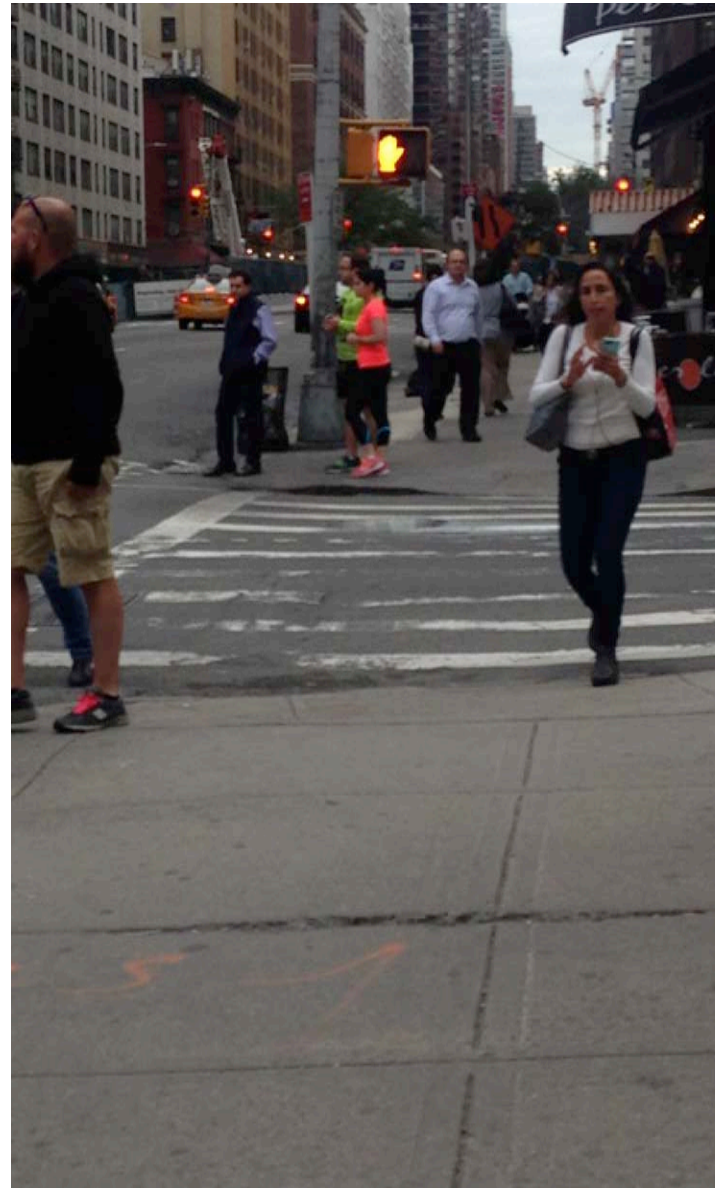

Right

# You Can't Care!

You see a red hand, it should be a no!

Wrong

# Think Back

Now that you took in those images, can you picture yourself doing the wrong things, or the right? A bigger percentage of these people probably are raising their hand for “the right”.

These are things you see, but don't take the time to think about. It is either that, or you could be doing something wrong, but you just don't realize it. Every thing you do, could be
