

An article on Graffiti in New York and New Jersey

By: Benjamin Kim

Pictures taken by my dslr and phone

Graffiti

Graffiti is a form of art
Where people draw
Certain symbols or names
While vandalizing a space.
Graffiti started in the mid
1960's in Philadelphia
When people took markers
And wrote on things
Like houses and stores.

Graffiti Hall of Fame

I found this one on the Harlem Graffiti hall of fame. It was located next to a park On the walls of 106-108 st. There is a lot more graffiti And you should check it out.

Essay Portion

The pictures were taken In Brooklyn and On the Harlem Graffiti Hall of Fame. I chose the topic Graffiti because it intrestes me because you can find it all over New York City.

Graffiti artists use their art the express their feelings. That is one way why people do Graffiti, another way is because the feeling of vandilisation and spray painting a wall that is not yours feels like you did a very awesome crime.

I don't encourage this but if you really want to clean up your awesome masterpiece and get sent to jail my pleasure. That is why when you see on the FDR there is always graffiti because people like to go to jail by writing their gang name and symbol on a window.

There are contests and competitions in the graffiti world so if you really want to vandilize you can go to one of those competitions and not get arrested. That is what Life is all about. Vandalizing and not paying fines. Also putting your gang name on a wall.

Banksy and other people and gangs,(not like mobsters these gang don't have guns) like The California Kings are known to be all over the world. Not mentioning Banksy because he got arrested like 27 times for vandilizing and spray painting stuff on a school in Harlem.

I hope you like my Photo essay and the pictures I took and realized that vandilng is'nt cool you can get in some big Trouble.(Not the game Trouble)
