

The sky of sunset

By Florence Cheung

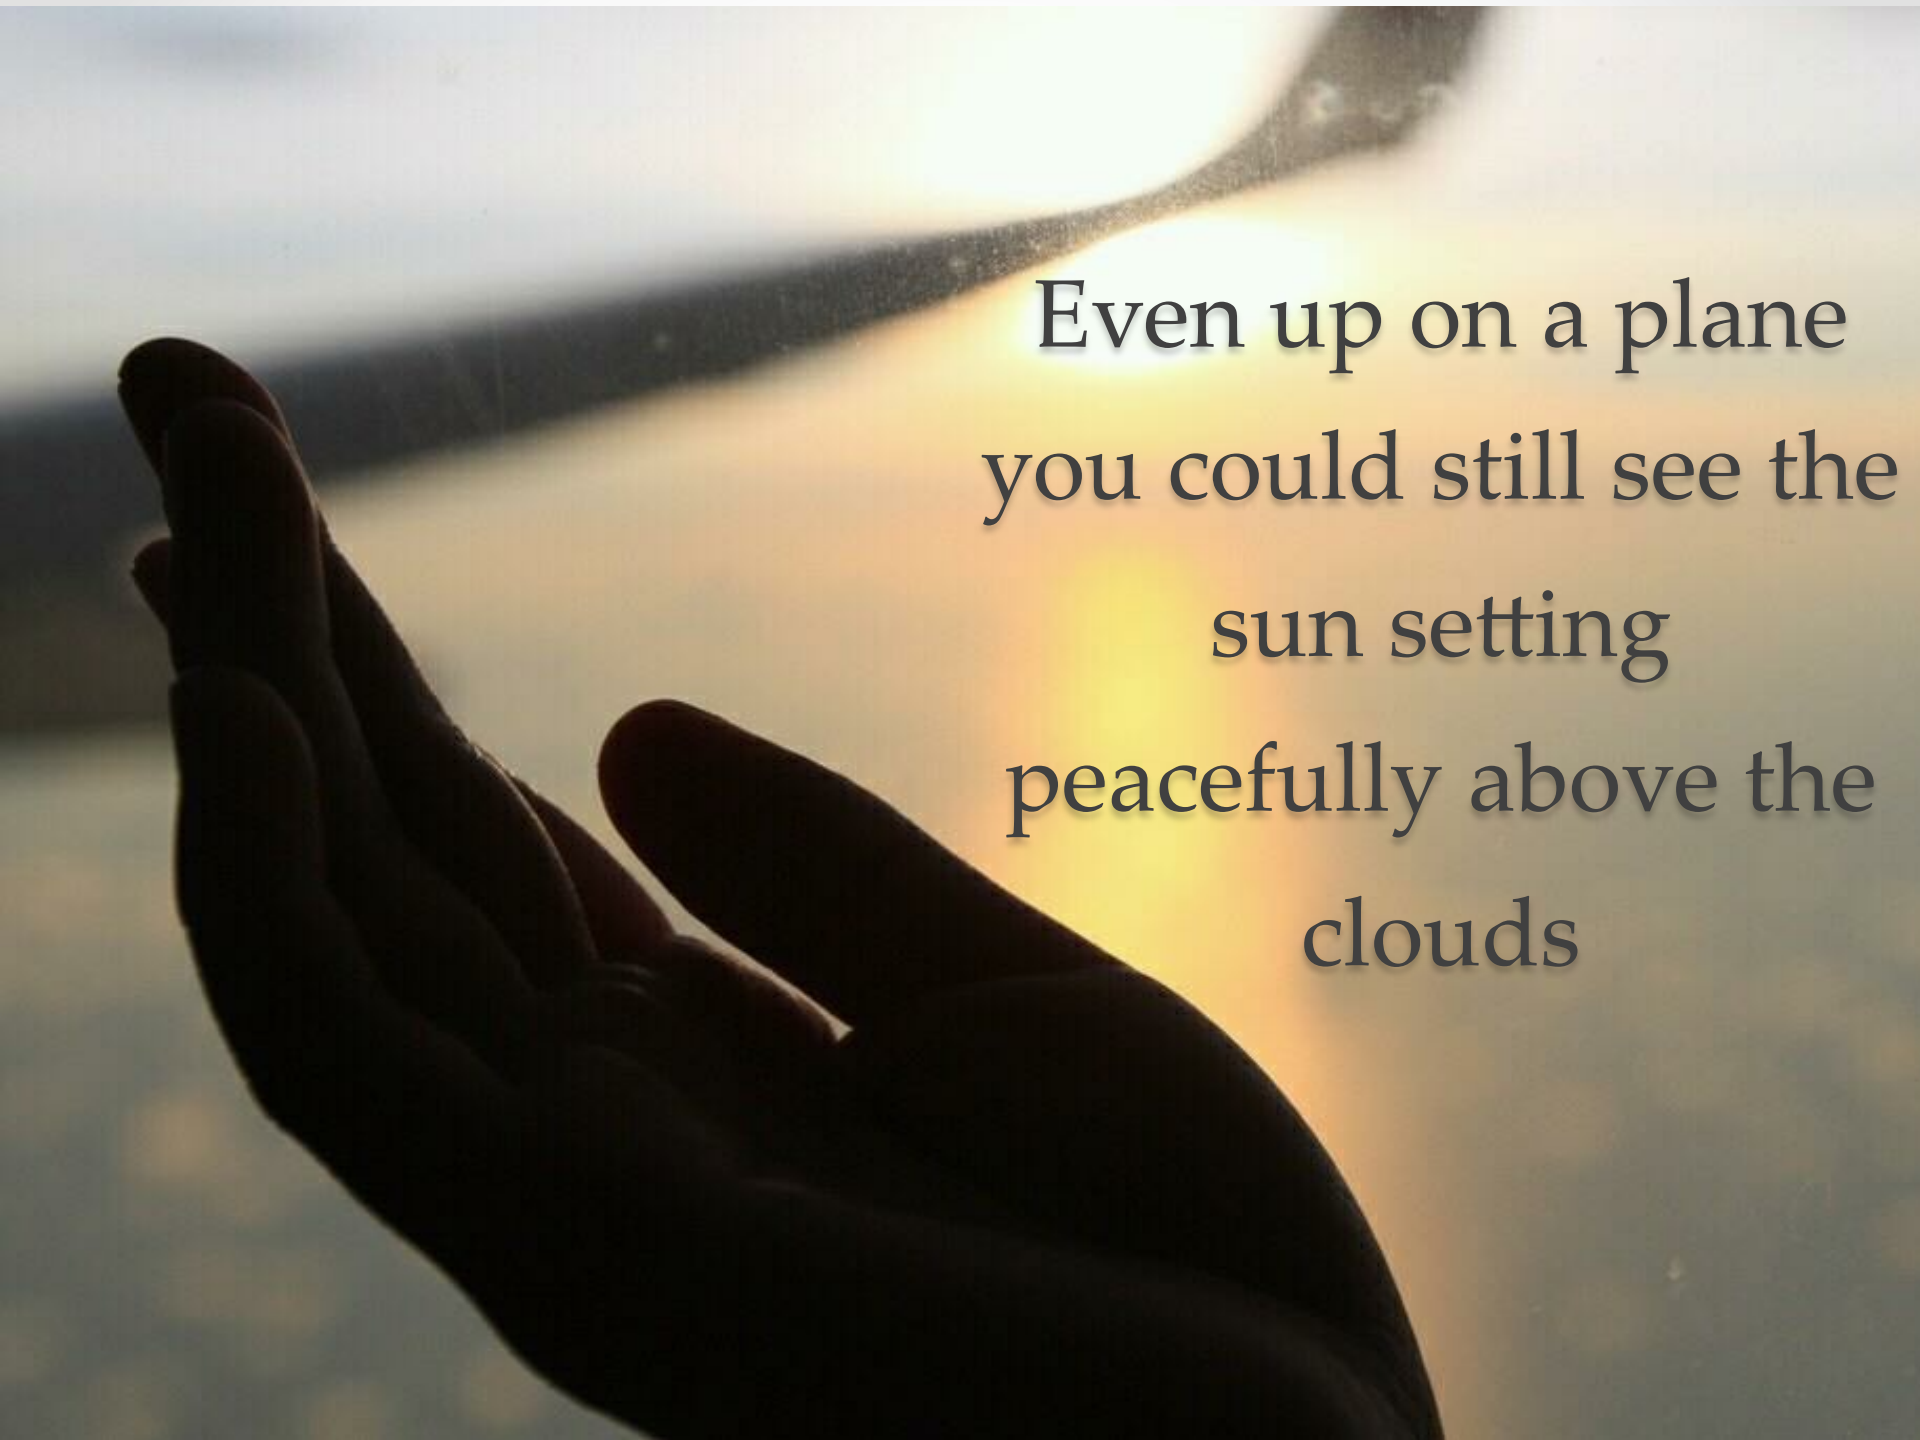

Introduction

Sunsets and sunrises are the most beautiful part of our daily life. It's red, orange, purple, dark blue, and light green mixing together, form an elegant picture if the busy day.

The sunlight has seven colors, red orange yellow green, indigo, blue and violet. When the sunlight reaches the atmosphere, some of the color will be reflected and that's the cause of different colors at sunset.

A close-up photograph of a hand reaching out towards a bright sun setting above clouds, viewed from an airplane window. The hand is in silhouette, reaching towards the sun. The sun is a large, bright, glowing orb, partially obscured by a dark, curved shape, likely the edge of the airplane window or a part of the aircraft. The background is a soft, hazy sky with a gradient of colors from light blue to yellow, suggesting a sunset or sunrise. The overall mood is peaceful and contemplative.

Even up on a plane
you could still see the
sun setting
peacefully above the
clouds

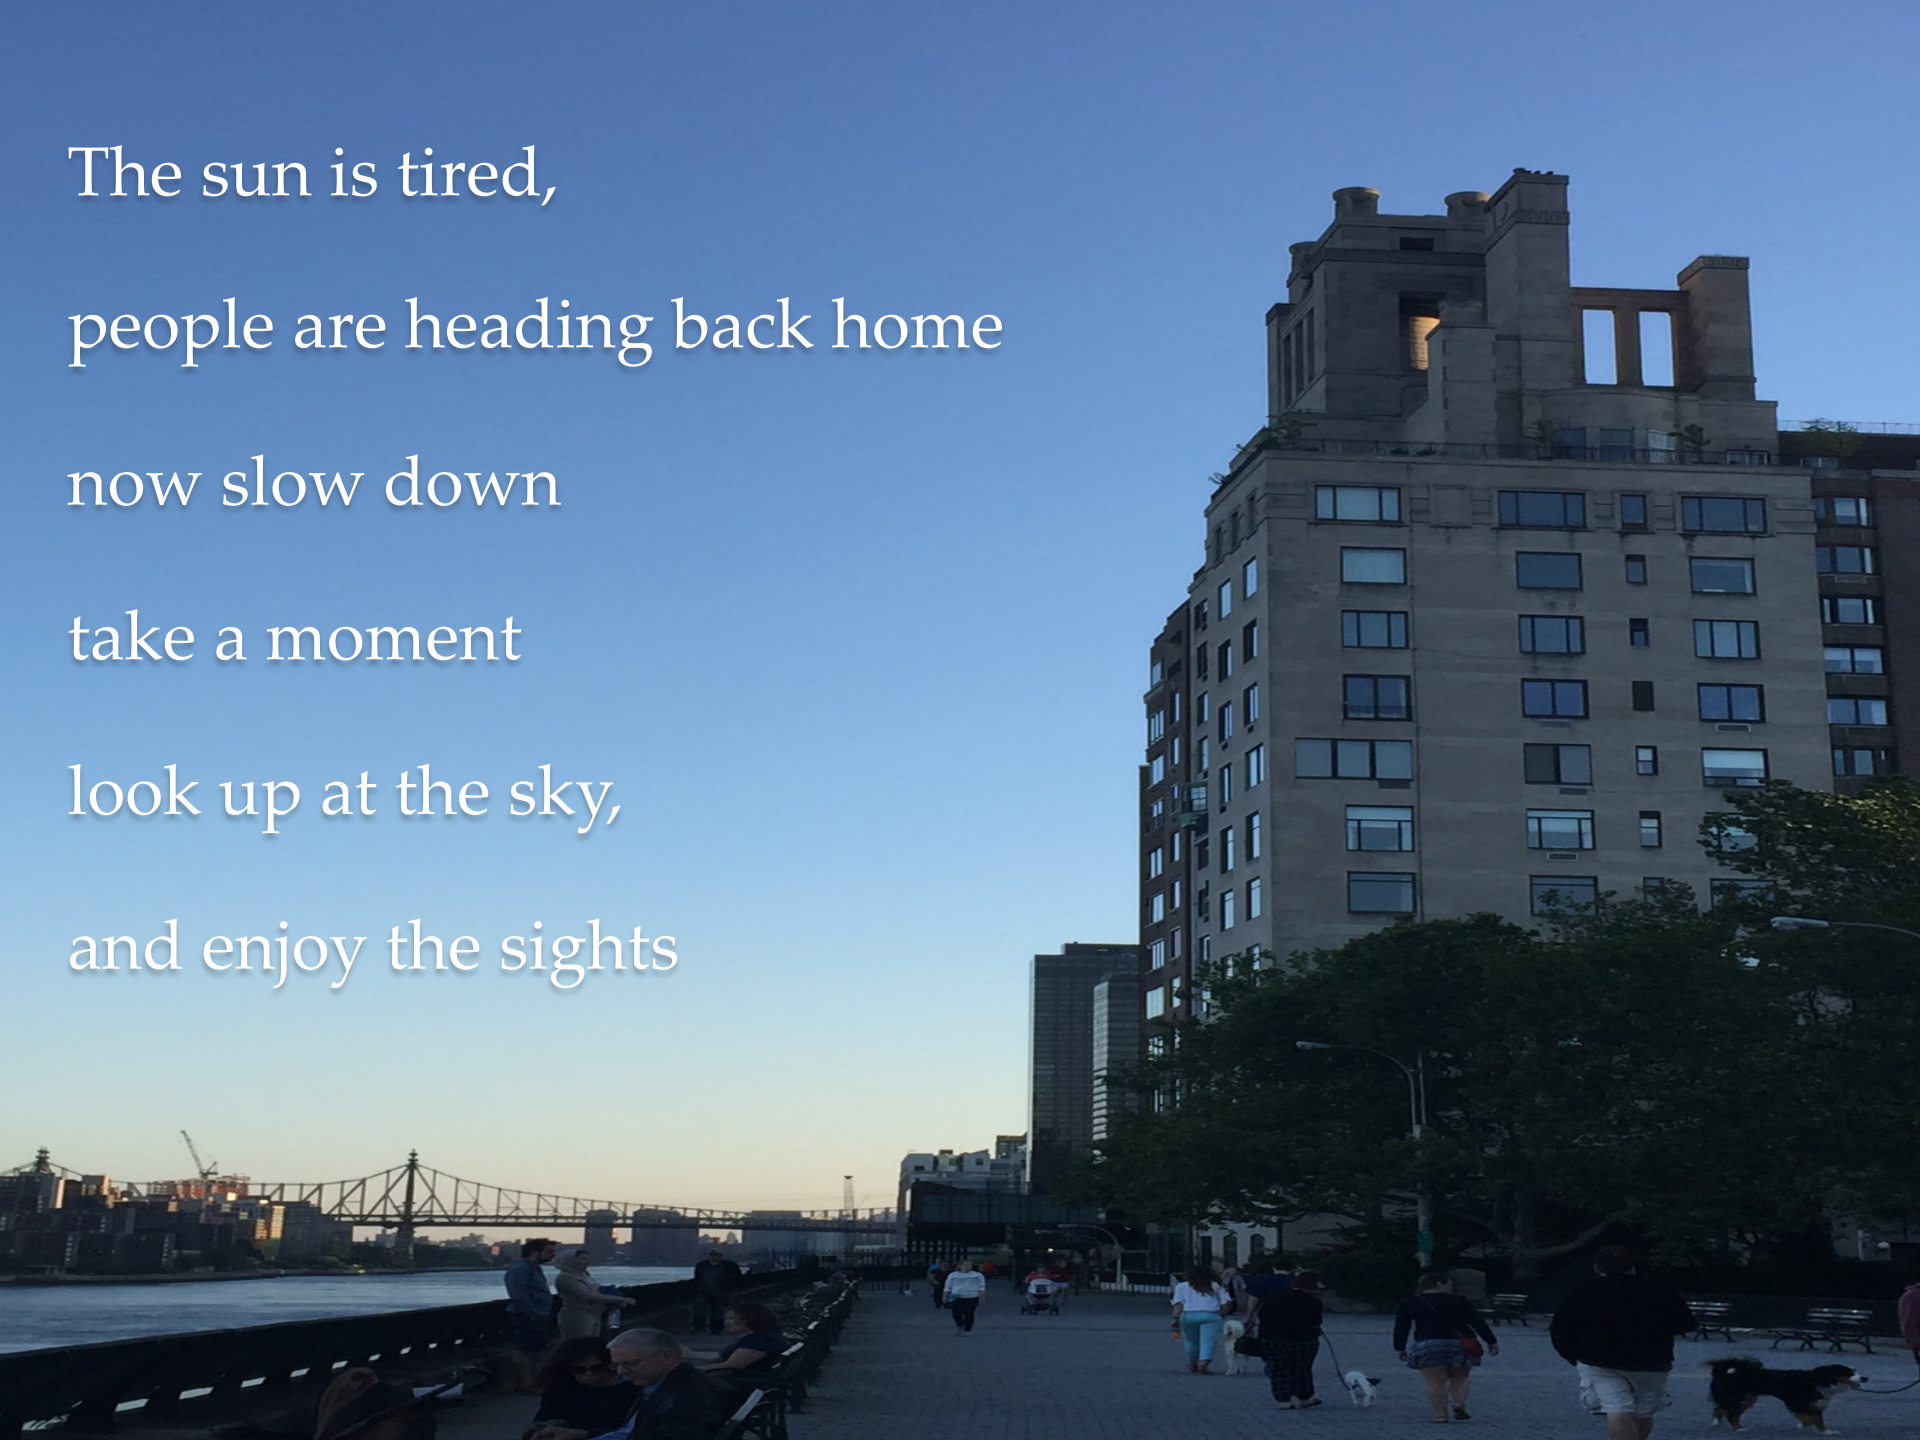

Sun set is a great
time of the day to
rest and go out for
a walk .

During summer, the sunsets is late because the sun is in the highest position of the sky, so the more north you are the longer the day gets in the summer, and in the winter, since the sun is farthest from the shy the shorter the day gets, so the earlier the sun sets

The sun is tired,
people are heading back home
now slow down
take a moment
look up at the sky,
and enjoy the sights

A serene sunset scene over a body of water. The sun is low on the horizon, creating a bright, golden glow that reflects on the water's surface. The sky is a mix of warm orange and soft yellow. Silhouetted trees line the background, and a small boat is visible in the middle ground. The overall mood is peaceful and contemplative.

Always remember to look up and
enjoy the most elegant moment of
the day.

- Topic

I choose to do this topic, because I always wonder how does the color of sunset work, and loved to take pictures of the sunset. And I also figure out that different settings of sunset affects how the picture comes out and the multi colors of sunsets.
