

SECURITY CAMERAS ARE EVERYWHERE

BY DANILA GOEBENKOV

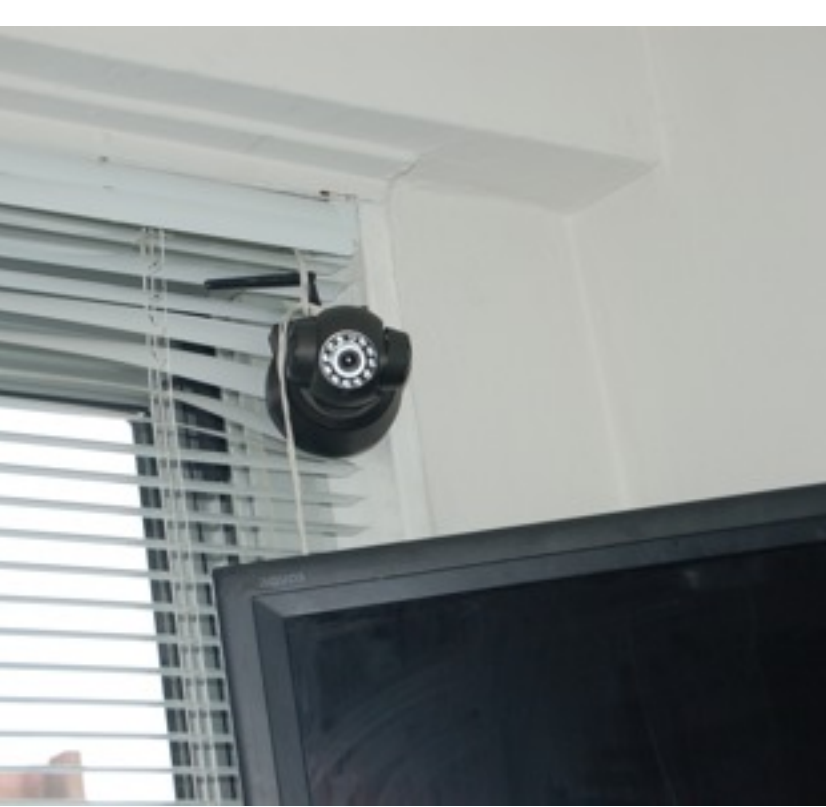

Did you ever wonder what that dome object is on the ceiling of a store or a bank? It's a **dome camera**. Those kinds of cameras usually move 360 degrees and tilt and zoom. I always thought, "That's so cool!" Also, those can be programmed to detect motion and look where the motion is and follow it.

Others, like **bullet cameras**, are hidden in lots of different objects, for example smoke detectors and clocks. So look out - they are watching you!

Type to enter text

**LOOK THERE'S A GUY INSTALLING A CAMERA.
THEY ARE EVERYWHERE.**

These are ip cameras that are used over the internet.

SOME ARE HIDDEN FOR EXAMPLE A SMOKE DETECTOR CAMERA.

The police have cameras on poles to watch the streets for any criminal activity.

SOME DETECT MOTION

This one is shaped like a bullet

Some have night vision

THEY ARE ON EVERY CORNER.

Some are fake like this one

**SOME ARE IN CAGES SO THEY
DONT GET MESSED WITH.**

PTZ -pan- tilt- zoom

**SOME HAVE LED=LIGHT -EMITTING -
DIODE**
**LOOK OUT THEY ARE WATCHING
YOU!**
