

A Dogs life

By: Hannah Kapchan

Dogs, you may think dogs can do nothing more than listen to commands.but dogs can do so much more than that.

a dog could change your life. you could be walking around

wishing you had some company. But you stop. You see a kennel. You think of getting a dog, then in five minutes you have a dog with you & not a care in the world. You're happy about your decision. And your new dog is happy too. You have a friend for life.

There was a lady, Ella Wendel, who gave her dog, 15,000,000 (add pounds sign). The dog's name was Toby Rimes and he got his money in 1931 before he was even born. ella already loved her dog before she even got to know him. But what would toby do with all of that money?

One of the largest dogs ever was a dog named Hercules, who

was and still is, a Guinness World Record holder. He weighs 282 lbs and has a 38 inch neck and paws the size of softballs. Can you imagine?

The owners of hercules wanted a big puppy so they already knew that they were looking for Hercules. They already loved Hercules before they even saw him.

All dogs come in different shapes and sizes. Some dogs are so small they can fit into your pocket book. While other dogs can be bigger than their owners. The tallest dog a.k.a “Giant Gorge” also holds a Guinness world record. Giant Gorge is really a giant. Can you believe this dog is 7 feet & 3 inches from head to tail and weighs 245 lbs.. He makes everything around him look small in comparison.

Some dogs also have different size features. For example, this bloodhound, Tigger, has the longest ears. His right ear is 13.75 inches long and his left ear is 13.5 inches long. Dogs are all unique in some way. Tigger is unique because of his long ears.

All dogs come in different shapes and sizes and are unique in some way. These dogs are a chihuahua and a dalmation. The chihuahua, considered a toy dog, is tiny while the dalmation is much taller.

when ever i get home, almost always grouchy my dog Moe runs to the door and gives me a wet slobery kiss. i feel instantly better, no longer grouchy i sit on the couch and pet him for a really long time. hes happy, i'm happy.

Things you should know about dogs

Dogs everywhere on earth share a common language that include certain sounds, postures, gestures and actions. This canine form of communication is inherited, but it is also learned through contact with other dogs.

*If you want to know more about dogs, read *The Original Dog Bible* by Kristia Mehas-Roe which you can find in the library.*
