

# *The Technology War*

*By: Isabel Yarema*

It's embarrassing that now I need to look a big screen with pictures to have fun. Technology has been wasted just to make people satisfied. In other words, people make technology just to make money. It's gone to far! Pick up a book instead of a computer. Technology should have just stayed the same. We need it as four channels, no cable and everything else that we have today should be gone. I know that is a little insane but I think that it would be better that way instead of how it is today. I know that technology isn't always used to satisfy us, but most of it is. I can name 5 examples of some. And yes, five is a lot.

\*TV

\*Digital watch

\*video games

\*computer

\*iTouch

I know, I use all of those things because I get bored easily but don't you think that I'm not the only one that thinks that technology can be a waste of time? I also have to tell you that more then 3/4 of the people that live in my building have all 5 of my examples. So, are you one of those people that is like that?

**OF course, mom goes for the new iron,Besides everyone would**

**What's wrong with an old iron? Its like a new one. People only like new.**

**It doesn't shock me that this was the one my mom wanted to use.**

I don't see anything wrong with this and it is just left in the corner of my house. My family will just leave it there and let it lay they're. It is to old for them.

*Nothing better then my phone! I love  
using it ALL DAY!*

*I will spend hours on the phone! I am  
sure a lot of other people do too.*

This clock has been here since 1920, seems like a long time and it is. It is the only one that has not been got rid of.

This is a clock, at least that's how I see it but not anyone else. They see it as a cool thing to have in their room. They WANT, WILL and CAN have it. Technology, STOP CHANGING!
