

What do we think when it comes to diners? The food? We should think deeper in what we know about diners. Like at the beginning some guy stumbles upon a building for sale. He has an idea that he can run his own business and make some money.

He has some ideas for his biz, because of the subject suppose he chooses a diner. Of course he buys the building and plans what it's going to look like.

A traditional diner has stainless steel to look fancy like in the picture shown. And of course so it doesn't look old.

Lets take a break from that guy. You might find in some diners a jukebox. A jukebox is a machine that plays music. Like an iPod except in a diner

Before the jukebox diners were just a wagon serving hot food. Soon there became more and more of them. The person who created diner was Ralph Schneider from Rhode Island.

So back to the guy, most diners look old fashion so the guy chooses it to look that way.

*We also need it to look attractive to people.  
How? Well diners are a place to chat with  
a friend and eat.*

*Diners at first were like a fast-food restaurants. Then it became a collision of a restaurant and a fast -*

*food restaurant. The word to describe it is convenient.*

*Diners are also convenient because they serve breakfast, lunch and diner. Also most diners would be near a main road. Diners serve food from around the world. So ... Enjoy!*
